

# Aircraft Management

A full suite of services delivering end-to-end peace of mind

Do you own an aircraft or plan to purchase one but don't have the time, energy or expertise to maintain it? Fleet Aviation is Westchester County Airport's only full-service aircraft management provider. Just outside Manhattan, you'll find our private hangar, in-house maintenance, fully compliant FAA-monitored record keeping, trained dispatch, executive pilots, and travel concierge at your service. But, the most important thing we offer is total peace of mind.

When your plane is under Fleet's watchful care, all you do is tell us when and where you want to fly. You can rest assured that your trip will be conducted with the highest levels of safety, efficiency, and personalized service.

Our status as an FAA certified Part 135 charter operator provides us with the experience and regulatory knowledge to maintain your aircraft to the highest standard. Unlike some management providers, all of our records are audited on-demand by the FAA – so you can be confident that every item regarding your aircraft and your safety is up to date and fully accounted for at all times. And we operate the most extensive in-house maintenance program at the airport, minimizing aircraft downtime and maximizing efficiency and reliability.

Fleet's Personalized Aircraft Management Services Include:
